

# DRINKING WATER TESTING CLINICS

Northern Shenandoah Valley  
JULY 2018

**Does your water come from a well,  
spring, or cistern?**

**Do you want to learn more about  
the quality of your water?**

**How it works:**

1. At a brief informational meeting, pick up a sample kit and get instructions to collect your household water sample.
2. Collect a sample from your tap at home and complete a short questionnaire.
3. Drop off sample at a designated location and time.
4. About four (4) weeks later, come back to get your confidential test results, an explanation of what the numbers mean, and information on how to handle any problems that are present.

The water testing covers the following parameters and potential contaminants: iron, manganese, sulfate, hardness, sodium, copper, nitrate, arsenic, fluoride, pH, total dissolved solids, coliform bacteria, e. coli bacteria, and lead. The cost for the sample analysis is \$50 which is due before the kick-off meeting where participants receive their sample kit(s). Please make checks payable to “*Treasurer, Virginia Tech*”. **Space is limited and pre-registration is required.** Reserve your space today; contact your local office of Virginia Cooperative Extension in the Northern Shenandoah Valley to pre-pay and pre-register. You can also register on-line using the urls provided for each county.

**Clinics will be offered in the counties of Clarke, Frederick, Page, Shenandoah, and Warren in July 2018.** Please see reverse for dates, times, locations, and cost.

***For more information, contact your local Extension office:***

VCE-Clarke County . . . . . 540-955-5164  
VCE-Frederick County . . . . 540-665-5699
